NB Engineering Works

— Engineering Reliability

SINCE 1996.

About NBE

Established in 1996 by Mr. Jaswinder Singh, NB Engineering Works has grown into a trusted name in the manufacturing of cast iron valves, cocks, and flow-control products. For nearly three decades, the company has been committed to delivering quality-engineered products that meet the demanding requirements of water supply, plumbing, agricultural, and industrial applications.

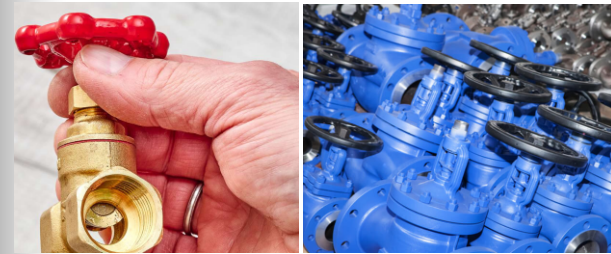

Driven by a vision of excellence and customer satisfaction, NB Engineering Works has continuously expanded its manufacturing capabilities while maintaining the highest standards of quality and reliability. Today, our modern production facility has a manufacturing capacity of approximately 6–7 metric tons per day, enabling us to efficiently serve customers across diverse markets.

At NB Engineering Works, every product is manufactured using carefully selected raw materials and undergoes rigorous quality inspections to ensure durability, dimensional accuracy, and long service life. Our commitment to precision manufacturing and continuous improvement has earned us the trust of distributors, contractors, institutions, and end-users alike.

Over the years, the company has built a strong reputation based on integrity, consistent quality, competitive pricing, and timely delivery.

Our Strengths:

- Established legacy since 1996
- Founded and led by industry expertise
- Manufacturing capacity of 6–7 metric tons per day
- Comprehensive range of cast iron valves and cocks
- Stringent quality control and testing procedures
- Skilled workforce and modern production facilities
- Commitment to customer satisfaction and timely delivery
